PROFESSIONAL SUMMARY

Software engineer and founder specializing in React, Next.js, and TypeScript with production experience delivering full-stack applications under real-world constraints. Founder of IMDEV — a software development studio building web apps, SaaS products, and AI integrations. Known for high-output execution, fast delivery cycles, zero missed deadlines, and building scalable, user-centered products.

PROFESSIONAL EXPERIENCE

Founder & Software Engineer — IMDEV (imdev.studio)

Remote · 2025 – Present

- Founded and launched IMDEV, a software development studio specializing in web apps, SaaS products, and AI integrations
- Built and shipped InkPlan — a full-stack AI-powered tattoo training SaaS with custom REST API, authentication, user progress tracking, and subscription tiers
- Designed and developed the IMDEV company platform at imdev.studio using Next.js, Tailwind CSS, and Framer Motion
- Leveraging AI tooling to deliver production-quality software faster without sacrificing architecture or code quality

Software Developer — Frontend Simplified

Remote · Sep 2025 – Present

- Completed production-level applications within 3-day delivery cycles maintaining a 4-day work schedule
- Maintained 100% project completion rate across all assigned work with zero missed deadlines
- Operated across 3 concurrent roles demonstrating strong time management and execution consistency
- Delivered multiple full-stack and frontend applications using React, Next.js, and TypeScript

PROJECTS

InkPlan — AI-Powered Tattoo Training SaaS

imdev.studio/inkplan · Live · imdev.studio

- Built full-stack SaaS from scratch — not a clone — with custom Node.js + Express REST API
- Implemented authentication, user profiles, progress tracking, and subscription tier architecture
- Integrated AI-powered features for guided learning and style exploration

Summarist — Subscription SaaS Platform

Next.js · Firebase · Stripe · TypeScript

- Built full-stack app with Firebase authentication, protected routes, and subscription gating
- Integrated Stripe for payment workflows and developed scalable UI architecture

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS

Frameworks: React, Next.js, TailwindCSS, Redux, Node.js, Express

Tools: GitHub, Vercel, Netlify, Figma, VS Code, Stripe, Firebase

Specialties: Full-Stack Development, SaaS Architecture, AI Integration, REST APIs

EDUCATION

Frontend Simplified — Full Stack Engineering Program

Remote · Sep 2025 – 2026 · React, Next.js, TypeScript, APIs, Full-Stack Development

Art Institute of Phoenix — Graphic Design & Web Design

2013 – 2014 · 3 semesters toward AAS · GPA: 3.0–3.5 · Institution closed before degree completion

Arizona Automotive Institute — Associate Degree, HVAC

Graduated 2010 · GPA: 3.9
